

Name: Marie E. Rognes
Born: October 7 1982
Nationality: Norwegian
Gender: Female
Present position: Chief Research Scientist, Simula Research Laboratory, Oslo, Norway

Education

2009 PhD in Applied Mathematics/Numerical Analysis (Date of conferred degree: 17.09.2009), Centre for Mathematics for Applications (Centre of Excellence), University of Oslo (UiO), Norway. Thesis title: *Mixed finite element methods for viscoelasticity and gels*
 2005 MSc in Applied Mathematics, Department of Mathematics, UiO

Current and previous professional positions

2016– Chief Research Scientist, Simula Research Laboratory, Oslo, Norway
 2022–2023 Visiting Scholar, University of California San Diego, La Jolla, CA, USA
 2020–2022 Professor II, Department of Mathematics, University of Bergen, Norway (20%)
 2014–2017 Consultant, Melior Innovations, Houston, TX, USA (part-time)
 2012–2016 Head of Biomedical Computing Department, Simula Research Laboratory
 2015–2016 Associate Professor II, Department of Mathematics, UiO (20%)
 2012–2016 Senior Research Scientist, Simula Research Laboratory, Norway
 2012–2013 Lecturer, Department of Informatics, UiO (part-time)
 2009–2012 Postdoctoral fellow, Center for Biomedical Computing, Simula Research Laboratory
 Jan–Jun 2007 Visiting Scholar, University of Minnesota Twin Cities, Minneapolis, MN, USA
 2005–2008 Research fellow, Centre for Mathematics for Applications, UiO

Awards, prizes, and academy memberships

- ◇ Member of the Norwegian Academy of Technological Sciences (2022–).
- ◇ 2022 Fulbright Scholarship Award, U.S.-Norway Fulbright Foundation for Educational Exchange.
- ◇ 2018 Royal Norwegian Society of Sciences and Letters Prize for Young Researchers within the Natural Sciences. This prize is awarded once annually to researchers in Norway below the age of 40 who have accomplished exceptional results within their field, with documented originality and talent.
- ◇ 2015 Wilkinson Prize for Numerical Software. The Wilkinson prize for Numerical Software is the most prestigious prize in the numerical software research community, awarded once every four years to the authors of an outstanding piece of numerical software. I won the 2015 prize for the *dolfin-adjoint* project (dolfin-adjoint.org), together with my co-authors P. E. Farrell, S. W. Funke and D. A. Ham.
- ◇ Founding Member of the Young Academy of Norway (2015–2019). The Young Academy of Norway was initiated by the Norwegian Academy of Science and Letters and targets talented, young researchers interested in working interdisciplinarily with broader issues. Only 20 members were selected from all scientific disciplines out of 160 applicants in this first cycle of four-year terms.
- ◇ 2015 Simula Research Award. This award is presented annually to honour excellent contributions to research undertaken at Simula that lead to new insight within the field.

Research, innovation and mobility grants

2022–2026 UiO Life Science Convergence Environment: *AUTORHYTHM: an interdisciplinary research environment to elucidate the role of autophagy in healthy aging* (16 MNOK) (co-PI)
 2021–2025 FRIPRO Research Grant, Research Council of Norway (Researcher project for scientific renewal): *Exciting times: Extreme modelling of excitable tissue* (12 MNOK) (Project leader)
 2017–2023 ERC Starting Grant (PE1 Mathematics), European Research Council: *Mathematical and computational foundations for modelling cerebral fluid flow* (1.5 MEUR) (Project leader)
 2016–2023 EPSRC CDT Oxford-Simula InFoMM Collaboration (~1 MNOK) (co-PI)
 2016–2019 FRIPRO Research Grant, Research Council of Norway (Young Research Talent): *The Numerical Waterscape of the Brain* (8.7 MNOK) (Project leader)
 2015–2018 Nordforsk Research Grant (the Nordic Council of Ministers): *Automated uncertainty quantification for numerical solution of partial differential equations* (6.7 MNOK) (Project leader)

| | |
|-----------|---|
| 2015–2016 | Horizon 2020 MSCA RISE Research and Mobility Grant: <i>Unique Biomaterial-Drug Solution for Multifunctional Central Venous Catheters</i> (1.8 MNOK total) (Work package leader) |
| 2014–2018 | Horizon 2020 MSCA ITN Grant: <i>TheLink</i> (34 MNOK total) (Associated partner) |
| 2012–2018 | RCN Centre of Excellence Center for Biomedical Computing: Robust Solvers and High-level adjoints: software and applications (~ 0.5 MEUR/year, Work package leader/PI) |
| 2007 | Leiv Eiriksson Programme Mobility Grant, Research Council of Norway (60 KNOK) (Project leader) |

Career breaks

| | |
|--------------|-----------------|
| May–Dec 2018 | Maternity leave |
| Jun–Dec 2013 | Maternity leave |

Lectures, short courses and other teaching activities

| | |
|------------|---|
| 2022 | Finite elements and brain multiphysics , Invited Guest Lecture (80 min), MAE 207: Finite element analysis in coupled problems, UCSD, La Jolla, US |
| 2021 | Lecture series on Brain modelling: from magnetic resonance imaging to finite element simulation , Porous Media Math Short Course Series, University of Bergen (online) |
| 2015, 2016 | Lecturer, 3-day course on FEniCS and Dolfin-adjoint, EPSRC CDT NGCM Summer Academy, University of Southampton, UK (top-rated course of the Academy) |
| 2015, 2022 | Lecturer and Project mentor, UCSD/UiO/Simula Summer School in Computational Physiology |
| 2015–2016 | Lecturer, Solid mechanics (MEK2500, 10 ECTS), Department of Mathematics, UiO |
| 2012–2013 | Lecturer, Numerical methods (INF-MAT2351, 10 ECTS), Department of Informatics, UiO |
| 2008–2013 | Lecturer and demonstrator, FEniCS short courses, including at the American Institute of Mathematics, California, USA; Imperial College London, UK; King Abdullah University of Science and Technology, Saudi Arabia; and University of Southampton. |
| 2001–2003 | Assistant teacher in different courses in mathematics and computer science (introduction to programming, programming with high-level languages, numerical linear algebra) at the Faculty for Mathematics and Natural Sciences, University of Oslo. |

Organization of scientific meetings (selection since 2013)

| | |
|------|---|
| 2024 | 13th European Conference of Mathematical and Theoretical Biology, July 2024, Toledo, Spain (Scientific Committee) |
| 2023 | SIAM CSE'23, Minisymposium organizer, Amsterdam, the Netherlands |
| 2022 | ECCOMAS Congress 2022, 8th European Congress on Computational Methods in Applied Sciences and Engineering, Oslo, Norway (Scientific Committee/Young Investigators Initiative Chair) |
| 2022 | Minisymposium at ECCOMAS 2022 (Advances in automatic code-generation software for for simulations in science and engineering), Oslo, Norway |
| 2020 | 2nd Oslo Brainphatics Symposium, Simula, Norway |
| 2019 | Minisymposium at ENUMATH 2019 (Discretizations of mixed-dimensional PDEs), Egmond aan Zee, the Netherlands |
| 2019 | 2019 SIAM Conference on Computational Science and Engineering, Spokane, US (Scientific committee) |
| 2019 | 5th Cerebrospinal Fluid Dynamics Symposium, Simula Research Laboratory, Norway |
| 2018 | PDESOFTE 2018, Bergen, Norway (Scientific committee) |
| 2018 | Minisymposium at ECCM-E CFD 2018 (Mathematical and computational modelling of fluid flow and transport in the brain and spinal cord), Glasgow, UK |
| 2016 | FEniCS'16, Simula Research Laboratory, Norway |
| 2015 | Minisymposium at 2015 SIAM Conference on Computational Science and Engineering (Efficient Solvers for PDE-Constrained Optimization mini-symposium) Salt Lake City, UT, USA |
| 2013 | 26th Nordic Seminar on Computational Mechanics, Simula Research Laboratory, Norway |

Scientific software projects (selection)

| | |
|-------|--|
| 2007– | Core FEniCS developer and Founding member of the FEniCS Steering Council (2016–) |
| 2011– | Founding member and core developer of the Dolfin-adjoint project |

Editorial board memberships

| | |
|-----------|---|
| 2022– | Associate editor, AIMS: Applied Mathematics for Modern Challenges (AIMS) |
| 2022– | Associate editor, ESAIM: Mathematical Modelling and Numerical Analysis (ESAIM: M2AN) |
| 2020– | Associate editor, SIAM Journal of Scientific Computing (SISC) |
| 2020– | Editorial board member, Springer Nature Partial Differential Equations and Applications |
| 2020– | Editorial board member, BMC Fluids and Barriers of the Central Nervous System |
| 2020–2023 | Topic editor, Journal of Open Source Software (JOSS) |

Other invited events

| | |
|------|---|
| 2024 | Invited Research Fellow "Numerical PDEs: Analysis, Algorithms, and Data Challenges" (Jan 29 – May 4, 2024), Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, Providence, RI, USA |
|------|---|

Other invited or elected memberships and positions

| | |
|-----------|--|
| 2024–2028 | Research Council of Norway Portfolio Board for Ground-breaking Research |
| 2023–2026 | European Mathematical Society Committee for Applications and Interdisciplinary Relations |
| 2023–2027 | Interpore Council |

Society memberships

| | |
|-------------|---|
| 2022– | European Mathematical Society (EMS) |
| 2022– | Society for Neuroscience (SfN) |
| 2014, 2022– | Society for Industrial and Applied Mathematics (SIAM) |

Reviewer for international journals

I have acted as a reviewer for the following scientific journals

SIAM Journal on Applied Mathematics, SIAM Journal on Scientific Computing, Mathematics of Computation, Mathematical Models and Methods in Applied Sciences, BIT Numerical Mathematics, ACM Transactions on Mathematical Software, Journal of Numerical Mathematics, Annals of Biomedical Engineering, International Journal on Numerical Methods in Biomedical Engineering, Nature Scientific Reports, PLOS Computational Biology, Fluids and Barriers of the Central Nervous System, Journal of Fluid Mechanics, Journal of Computational Physics, and Geoscientific Model Development.

Evaluation committee

- ◇ Member of **PhD thesis evaluation committees** at LSM Ecole Polytechnique, Paris, France (2023); the MOX, Politecnico di Milano (2018, 2020); Department of Mathematics and Computer Science, University of Southern Denmark, Odense (2018); Department of Computer Science, Imperial College London (2014); Department of Informatics, University of Grenoble, France (2013); and the Department of Informatics, University of Bergen, Norway (2012);
- ◇ Member of **faculty evaluation committees** at the Department of Mathematics, University of Uppsala (2020), the Department of Mathematics/Informatics, Oslo and Akershus University College (2014), and the Department of Informatics, UiO (2001);
- ◇ **Panel member** and **external reviewer** for a number of national, European and international research councils (2015–2024); further details omitted.

Supervision of postdoctoral fellows and graduate students*Postdoctoral fellows*

- VIII) Dr. Rami Masri studies *mixed-dimensional modelling of excitable tissue* as a Postdoctoral Fellow with me at Simula (2022–);
- VII) Dr. Pietro Benedusi studies *extreme scale modelling and simulation of excitable tissue* as a Postdoctoral Fellow with me at Simula (2022–);
- VI) Dr. Marte Julie Sætra studies *modelling and simulation of electrodiffusion and interstitial fluid flow* as a Postdoctoral Fellow with me at Simula (2021–);

- V) Dr. Ingeborg Gjerde studied *predictive modelling of perivascular flows* as a Postdoctoral Fellow in the Waterscales (ERC) project at Simula (2020–2022), and was subsequently employed as a Research Engineer at Simula;
- IV) Dr. Cécile Daversin-Catty studied *mixed dimensional mathematical and computational modelling* as a Postdoctoral Fellow in the Waterscales (ERC) project (2017–2021), and was subsequently employed as a Research Scientist at Simula;
- III) Dr. Travis B. Thompson studied *mixed finite element methods for multiple-network poroelasticity* as a Postdoctoral Fellow in the Waterscape (RCN) project (2017–2019). Thompson was next a Postdoctoral Research Associate at the Department of Mathematics, University of Oxford, before accepting a faculty position at Texas Tech University, Texas, US.
- II) Dr. Rocio Rodriguez-Cantano studied *uncertainty quantification in cardiac electromechanics* as a Postdoctoral Fellow in the AUQ-PDE (NordForsk) project (2016–2018);
- I) Dr. Simon Funke studied *predictive modeling in physiological flow* as a postdoctoral fellow with me at Simula (2013–2015). Funke was subsequently awarded a FRIPRO Young Research Talent Grant, became a Senior Research Scientist and Research Director at Simula, and is now CEO of a deep technology start-up company.

PhD students

- xvi) Ms. Ingvild Devold is currently pursuing her PhD in Computational physiology on the topic of *Mechanochemical interplay underlying human performance* under my supervision (with P. Rangamani, UCSD as co-supervisor) at Simula.
- xv) Mr. Balint Laczko is currently pursuing his PhD in Music technology on the topic of *sonification of autophagy* under my co-supervision (with A. Jensenius as main supervisor) at RITMO, University of Oslo.
- xiv) Ms. Nanna Berre is currently pursuing her PhD on the topic of *cut finite element methods for modelling excitable tissue* under my co-supervision (with A. Massing as main supervisor) at the Norwegian University of Science and Technology.
- xiii) Ms. Eirill Strand Hauge is currently pursuing her PhD on the topic of *cellular modelling of electrochemical interactions in neural tissue* under my supervision at Simula.
- xii) Ms. Georgia Brennan is currently pursuing her DPhil on the topic of *Mathematical modelling of clearance-mediated proteopathy with application to Alzheimer’s disease* under my co-supervision (with A. Goriely as main supervisor) at the University of Oxford.
- xi) Mr. Marius Causemann is currently pursuing his PhD on the topic of *Mathematical and numerical foundations for modelling deforming excitable tissue* under my supervision at Simula.
- x) Mr. Martin Hornkjøl is currently pursuing his PhD under my co-supervision (with K. A. Mardal as main supervisor) at the University of Oslo.
- ix) Dr. Eleonora Piersanti completed her PhD on *Parameter-robust formulation and preconditioning of poroelasticity equations for brain modelling* under my supervision at Simula in 2023. Piersanti is now a software and data science consultant at Expert Analytics, Oslo, Norway.
- viii) Dr. Nicolas Boullé completed his DPhil under my co-supervision (with P. E. Farrell as main supervisor) at the University of Oxford in 2022. He is now a Simons Postdoctoral Research Fellow in Mathematics at the University of Cambridge.
- vii) Dr. Ada J. Ellingsrud completed her PhD on *Computational modelling of electrodiffusion and osmosis in cerebral tissue* under my supervision at Simula in 2021. Ellingsrud is now a Research Scientist at Simula, Coordinator for the Simula@BI Research Centre, and Head of Simula’s Scientific Computing and Numerical Analysis Department.
- vi) Dr. Lars M. Valnes completed his PhD on *Patient-specific Modeling of the Human Brain using Magnetic Resonance Imaging* under my co-supervision (with K.-A. Mardal as main supervisor) at the University of Oslo in 2020. Valnes is now a Research Engineer at Oslo University Hospital – Rikshospitalet, Norway.
- v) Dr. Vegard Vinje completed his PhD on *Mathematical Modeling of Cerebrospinal Fluid Pulsatility and Pathways* under my supervision at Simula in 2019. Vinje was next a Research Scientist and Research Director for Scientific Computing at Simula, and is now with Expert Analytics AS.
- iv) Dr. Matteo Croci completed his DPhil (PhD) in Mathematics on *Multilevel Monte Carlo Methods for Uncertainty Quantification in Brain Simulations* under my co-supervision (with P. E. Farrell and M. Giles as main supervisors) at the University of Oxford in 2019. Croci is now a Postdoctoral Research Fellow at the Oden Institute, University of Texas at Austin, US.

- iii) Dr. Gabriel Balaban completed his PhD on *Adjoint Data Assimilation Methods for Cardiac Mechanics* under my supervision at Simula in 2017. He subsequently won a Postdoctoral Research Associate position at King's College London, UK and a Postdoctoral Fellowship in Bioinformatics at the University of Oslo; he is now Associate Professor at Kristiania University College.
- ii) Dr. Giulia Pizzichelli completed part of her PhD studies with me (and with E. Sinibaldi as main supervisor) at Simula in 2015 and graduated from the School of Advanced Studies, Pisa/Istituto Italiano di Tecnologia, Italy in 2016.
- i) Dr. Andre Massing completed his PhD on *Analysis and Implementation of Finite Element Methods on Overlapping and Fictitious Domains* under my co-supervision (with A. Logg as main supervisor) at Simula in 2012. He was subsequently offered an Assistant Professorship at Umeå University, Sweden, and is now an Associate Professor at the Norwegian University of Technology and Science, Trondheim, Norway.

MSc students

I have supervised or actively co-supervised the following MSc students in their thesis research at the Departments of Informatics and/or Mathematics at the UiO, at the Norwegian University of Technology and Science, Trondheim, Norway, at the University of Trento, Italy, and at Karlsruhe Institute of Technology, Germany:

Åsmund Aamodt Resell (2022), Nanna Berre (2022), Marius Causemann (2020), Emilie Ødegaard (2018), Valentyna Pysarieva (2018), Carlo Cisale (2017), Janis Grobovs (2017), Vegard Vinje (2016), Ada J. Ellingsrud (2015), Ingeborg Sauge Torpe (2014), Nina Ødegaard (2014), Eline Sundt (2012), Fredrik Valdmanis (2012),

Preprints

- 58. I. A. Baratta, J. P. Dean, J. S. Dokken, M. Habera, J. S. Hale, C. N. Richardson, M. E. Rognes, M. W. Scroggs, N. Sime and G. N. Wells, [DOLFINx: the next generation FEniCS problem solving environment](#), Zenodo, 2023

Scientific presentations (selection since 2016, upcoming events marked by *)

I have given more than 90 scientific presentations (including keynotes, plenary lectures, invited talks) since 2007 including

- 2025* Plenary Lecture, 30th Biennial Numerical Analysis Conference, University of Strathclyde, Glasgow, Scotland
- 2024* Keynote Lecture, Amsterdam Center for Dynamics and Computation workshop on “Numerical brain: inverse and forward problems”, Vrije Universiteit Amsterdam, the Netherlands
- 2024* Keynote Lecturer, the Woudschoten Conference of the Dutch-Flemish Scientific Computing Society, the Netherlands
- 2024* Plenary Lecture, Nasjonalt matematikermøte (Norwegian Mathematics Meeting), Oslo, Norway
- 2023 Invited minisymposium talk: *In-silico brain flow and transport*, 2023 International Congress on Industrial and Applied Mathematics, Tokyo, Japan,
- 2023 Invited Numerical Analysis and Scientific Computing Seminar: *Perivascular pathways and the dimension-2 gap*, Courant Institute, New York, US
- 2023 Invited Applied Mathematics Seminar *Perivascular pathways and the dimension-2 gap*, Brown University, Providence, US
- 2023 Invited Oden Institute Seminar *Brains in motion - computational modelling of the brain's waterscape*, University of Texas at Austin, TX, US
- 2023 Invited CMOR Colloquium, *Perivascular pathways and the dimension-2 gap*, Rice University, Houston, TX, US
- 2023 Invited Fluid Mechanics, Combustion, & Engineering Physics Seminar, *Brains in motion - computational modelling of the brain's waterscape*, UCSD, La Jolla, CA, USA
- 2022 Invited Institute for Neural Computation Chalk Talk, *Mathematical modeling of human brain transport: from medical images to biophysical simulation*, San Diego Supercomputer Center, La Jolla, CA, USA
- 2022 Plenary lecture, *Such stuff as dreams are made on: a finite element tale of optimal transport and brain clearance*, 30 years of Acta Numerica, Banach Center at Bedlewo, Poland
- 2022 Semi-plenary lecture, *Mathematical modelling of the human brain*, 2022 ECCOMAS Congress, Oslo, Norway

- 2022 Invited Pretty Porous Science Seminar, University of Stuttgart, Stuttgart, Germany
- 2022 Invited seminar, *Mathematical modelling of human brain transport: from medical images to biophysical simulation*, Laboratoire de Mécanique des Solides, Ecole Polytechnique, Paris, France
- 2021 Invited lecture, *Modelling intracranial pressure, fluid flow and solute transport in surface perivascular space*, BrainH20 Symposium, Copenhagen, Denmark (online)
- 2021 Semi-plenary lecture, *Understanding the mechanisms of the brain's waterscape*, 2021 InterPore Conference (online)
- 2021 Invited talk, *Depressed brain cells - a numerical perspective*, 6th Oxford International Neuron and Brain Mechanics Workshop (online)
- 2021 Invited seminar, *Numerical foundations of the brain's waterscape*, Laboratoire Jacques-Louis Lions, Sorbonne University, Paris, France (online)
- 2021 Plenary lecture, *Computational brainphatics*, 2021 SIAM Conference on Computational Science and Engineering (online)
- 2020 Invited lecture, Springer Partial Differential Equations and Applications webinar (online)
- 2020 Invited seminar, Oxford Center for Industrial and Applied Mathematics, Oxford, UK
- 2019 Invited talk, *UQ of parenchymal tracer distribution using random diffusion and convective velocity fields*, 5th biennial CSF Dynamics Symposium, Oslo, Norway
- 2019 Invited talk, *Nearly incompressible generalized poroelasticity - discretization and preconditioning*, International workshop in connection with Ragnar Winther's 70th birthday, Oslo, Norway
- 2018 Invited talk, 2nd Workshop on computational aspects of perfusion and flow in live tissue, Bergen
- 2017 Invited seminar, *The numerical waterscape of the brain*, Université libre de Bruxelles, Belgium
- 2017 Invited talk, Biomechanics of living systems, from cells to organisms workshop, Oslo, Norway
- 2017 Plenary lecture, *Compatible discretizations in our hearts and minds*, European Conference on Numerical Mathematics and Advanced Applications, Voss, Norway
- 2017 Invited talk, *Accurate numerical modelling of small collections of cardiac cells*, FEniCS'17, Luxembourg
- 2017 Plenary lecture, *Impact of high abstraction/high performance finite element software in biomedical computing*, 24th International Conference on Domain Decomposition Methods, Svalbard, Norway
- 2017 Keynote lecture, *The PDEs of our hearts and minds*, Women in PDEs, Karlsruhe, Germany
- 2016 Plenary lecture, *High-level abstractions, algorithms and applications in forward and inverse finite element solution of PDEs*, Nordic Seminar on Computational Mechanics, Chalmers, Sweden
- 2016 Invited seminar, *Developing simulation technology to solve biomedical problems: analysis, implementation and applications*, University of Uppsala, Sweden
- 2016 Invited talk, University of Southampton, UK
- 2016 Invited talk, *The FEniCS and Dolfin-adjoint projects*, Higher-order DG methods and finite element software for modern architectures workshop, University of Bath, UK

Outreach and popular science (selection since 2016, upcoming events marked by *)

- 2022 Waterscales: Mathematical and computational foundations for cerebral fluid flow, European Mathematical Society Magazine (invited article)
- 2022 University of Bergen, Museum exhibit, Porous media flow
- 2018 *Hjernens vannveier*, Public lecture at the Norwegian Academy of Technological Sciences, Bergen, Norway
- 2018 *The research life*, invited talk for Young Scientist Contest Finalists, Research Council of Norway
- 2017 TEDx talk, [Mathematics that cures us](#), TEDxOslo, Oslo, Norway
- 2017 Invited talk, *Making models of your brain's waterscape*, 2017 Cutting Edge Festival, Oslo
- 2016 Invited talk, *Time scales of mathematics: from basic research to societal application* RCN workshop on the importance of mathematics for value creation, Lysaker, Norway
